

Bronze Vitality Combo

with Melanin Response

Two in One Combo

Brazilian Bronze Lotion

&

Brazilian Bronze Tan Enhancing Capsules

KEY POINTS

Enhances tanning internally and externally
Stimulates melanin production
Reduces the time needed to get a beautiful tan
Greatly reduces sun and UV damage after tanning
Moisturizes the skin

Brazilian Bronze lotion is non-staining to cloths or tanning beds and contains Tyrosine, an amino acid which stimulates melanin production deep within the skin where tanning begins. Without melanin in the skin, the body lacks the ability to develop a deep, dark, natural tan. Once the melanin is activated, the skin responds faster to ultraviolet light. You will spend less time exposing your skin to UV light, greatly reducing its damaging effects. Brazilian Bronze drenches your skin with Aloe, Coca butter and Vitamin E, replacing moisture lost during tanning..

You can use your Sun block with it without reducing its efficacy.

Brazilian Bronze Tan: Tan Enhancing Capsules. A beautiful tan begins within the layers of healthy skin. The body requires specific nutrients to promote and maintain ideal conditions for the skin, especially after exposure to UV light or sunlight. All natural Brazilian Bronze Tan is specifically formulated for hard to tan skin types.

Brazilian Bronze Tan goes beyond tanning by creating healthy, glowing skin that is supple and moist- it is a vitamin for your skin! You ll notice a remarkable difference in the texture and the tanning ability of your skin.

Brazilian Bronze Tan contains no dyes, colorants, yeast, sugar or starches. You must expose your skin to UV light or sunlight in order for tanning to occur.

Brazilian Bronze Tan: The Tanning Pill w/ L-Tyrosine
Brazilian Bronze Lotion w/ Melanin activator, Coco Butter and Aloe Vera
For Extra Moisture
