

*Phase 2*  
STARCH NEUTRALIZER  
Seen in *Woman's World Magazine*

We are producing new label & bottle – New label will read 60 Tablets (not Capsules)

**“CARB POLICE™” our double-strength formulation will  
ARREST - BLOCK & LOCK those CARBS AWAY FOREVER.**

**CARB POLICE™** is considered by many to be the strongest carbohydrate blocker on the market today. Our **“Golden Pill”** is 1,000mg per serving of Phase 2™ - double the strength of similar products sold today - **in just one pill.** Phase 2™ is a safe, yet a very powerful nutritional ingredient, clinically studied to reduce the absorption of starch calories. Phase 2™ allows you to enjoy those foods that you love without all the calories. Phase 2™ is an amazing, non-stimulant, all-natural protein derived from the white kidney bean.

**Ingredients - Serving Size: 1 Tablet, 60 Servings Per Bottle.**

Phaseolamin 2250™ 1000mg (Phaseolus Vulgaris Standardized Extract); Bitter Melon 300mg (Momordica charantia Standardized Extract)(Standardized to 0.6% Charantin; 7% Bitter Principles); and Gymnema Sylvestre Leaf 150mg.

Carbohydrates...we love them...we crave them...they give us energy. They taste so good! And we eat a lot of them. We Americans eat more carbohydrates now than ever before. After 30 years of "eating low fat" foods, we've gained 50 more pounds per year than 10 years ago, and what's truly amazing is that 60% of adults are classified as overweight or obese. Have you ever wondered why after a large meal (of refined carbohydrates) you're hungry again in an hour or 2? That's because refined carbohydrates make a flood of insulin, which clears the glucose from the blood very quickly, signaling hunger. So we crave more and snack between meals, adding more carbohydrate calories than we burn. Enough of this "bad" news - now on to the "great news."

Our new approach to this old problem is *Phaseolamin 2250* or *Phase 2™* (for short). *Phase 2™* is derived from the white kidney bean (*Phaseolus Vulgaris*), which slows down the digestion of starch by neutralizing alpha-amylase before it can convert starch into glucose and then fat. Essentially, this enzyme breaks down starch into small units that can be absorbed and pass through your digestive system with less caloric intake. This key enzyme breaks down starch into glucose so that the body can absorb it. When starch digestion is slowed, starch passes through the body without being fully absorbed. The Bitter Melon extract (which works on the simple sugar carbs) increases the body's utilization at a faster rate.

Studies have shown that 1,000mg of *Phase 2™* can effectively aid in moderate, healthy weight loss. In the latest study, patients that took *Phase 2™* lost an average of 1/2 pound per week and 1.3" off their waistline.

**GOOD LUCK ON YOUR COMMITMENT TO LOSS WEIGHT!**
