

SCULPT & SLIM™

Weight Loss Cream

AN AMAZING NEW WAY TO START LOSING INCHES AND REDUCE FAT...Everyone has fat cells. Unfortunately, some fat cells naturally retain a higher percentage of fat than others, making it extremely difficult, if not impossible, to eliminate unwanted fat in certain areas of the body. Since our bodies are programmed to store this fat, dieting and exercise usually fails to release it. Thus, science must step in and do what nature won't do on its own... **LIBERATE STORED FAT!** *SCULPT & SLIM™* Cream utilizes a patented liposome delivery system which transports the "all natural active ingredients" directly through the skin and into the fat cells. The active ingredients increase metabolism (burning of fat) in the fat cells (reducing the size of individual fat cells and the thickness of the fat layer)*. *SCULPT & SLIM™* also increases moisture in the deepest layers of the skin (hydrating the skin for increased softness and smoothness, and improved texture).

Clinical studies show *SCULPT & SLIM™* provides measurable improvements that diminish the appearance of cellulite, as used in a cream at 3% applied to twenty panelists twice daily for 56 days (see photos at right):

• Skin firmness was increased an average of 27.8%! (Ballistometry) • Visible appearance of cellulite ('orange peel skin') was reduced as much as 80% and 33% on average! (Profilometry by Image Analysis) *SCULPT & SLIM™* Visibly helps firm and smooth the skin; minimizing the appearance of cellulite fat. *SCULPT & SLIM™* Reduces the appearance of cellulite and increases skin firmness. Based on Co-Enzyme A and a Chinese plant extract, *SCULPT & SLIM™* helps to transform the fat via the G-Protein and convert it to energy. In vivo image analysis studies show that *SCULPT & SLIM™* significantly reduces the visible, "orange peel" appearance of cellulite (- 33%), while significantly increasing skin firmness.
