- Lasts 1-2 hours
- Effects are immediate
- Proven in clinical trials
- Easy to use
- No side effects

VIGEL™ is a nonprescription, topical gel that is applied directly to the clitoral area to enhance libido and stimulate orgasmic pleasure. **VIGEL™** is made for ALL women: from those who have experienced a loss of sexual desire to those who wish to become multi-orgasmic.

VIGEL™ contains two main ingredients: L-Arginine and Peppermint.

These powerful ingredients are responsible for enhancing female arousal. Specifically, L-Arginine causes the production of nitric oxide, which increases blood flow to the area, while the peppermint intensifies the sensitivity with a **delightful tingling and cooling sensation**. In 1998 the Nobel Prize for Medicine and Physiology was awarded for the discovery of the "Nitric Oxide Pathway" which is the basis for clitoral erection.

VIGEL™ is the ONLY product on the market that contains these two key ingredients responsible for feminine sexual arousal. It is a sterile, pharmaceutical grade product manufactured to the strictest specifications. Use only as directed. Do not use if pregnant. Discontinue use if irritations occur. Avoid contact with eyes. Please consult a physician if you have a sexual dysfunction.

FOR TOPICAL USE ONLY – NON-PALATABLE. **VIGEL™ is safe and proven effective.**

Ingredients:

The active ingredients are L-Arginine and Peppermint. Other ingredients include Purified Water, Propylene Glycol, Hydroxyethylcellulose, and Methylparaben.
